NEW VARIETIES TO SEE

Will take this opportunity to tell you about some new and lovely varieties which we are very proud to show. These were given to us by our good friend, Mr. Clifford Wells, of Hood River, Oregon. Mr. Wells has been growing and showing seedlings for years, and has won many a ribbon in the seedling division. He has been unusually successful with seedlings. Some have blends of color we have never seen before. When he brought us some tubers from these "Lovelies" we felt very fortunate to have them.

As these are from the beautiful Hood River Valley, with the magnificent view of Mount Hood in the distance, we thought it a good idea to name them after "The Mountain." So as we show them you will be able to identify them as varieties from the Clifford Wells garden in the Hood River Valley.

Place your orders early in the season as orders are filled in the order taken. No substitutions unless you request them.

We cordially invite you to visit our gardens and greenhouses any time.

We Would Appreciate Your Selecting a Substitute When You Order It Sometimes Helps a Lot.
